EN

How to connect your Soundsync to two mobile phones at same time:

This function is only available in RX mode.

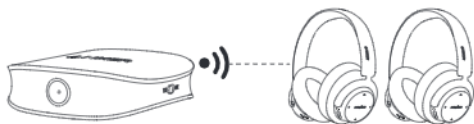

1. Connect the first mobile phone to your Soundsync, turn off the Bluetooth of the first mobile phone once connected.
2. Press multi-function button twice to enter Bluetooth pairing mode.
3. Connect the second mobile phone to your Soundsync. Once the second mobile phone is connected to Soundsync, turn on the Bluetooth of the first mobile phone, then find Soundsync in your pairing list. Click it for connection, make sure the connection is successful.

Soundsync can only play the music on one mobile phone at a time.

06

EN How to connect your Soundsync to two Bluetooth headphones / speakers at same time:

You can play music on both headphones / speakers at same time. This function is only available in TX mode.

1. Connect your Soundsync to the first Bluetooth headphone / speaker. Press the multi-function button on your Soundsync and hold for 2 seconds to enter Bluetooth pairing mode (or double click multi-function button to activate Bluetooth pairing mode).
2. Place your Soundsync next to the first headphone / speaker and wait 30 secs for connection. Once Soundsync is successfully connected to the first headphone / speaker, turn off both your Soundsync and the first headphone / speaker.
3. Turn on the Bluetooth of the second headphone / speaker. Press the multi-function button on your Soundsync and hold for 2 seconds to enter Bluetooth pairing mode (or double click multi-function button to activate Bluetooth pairing mode).

07

4. Place your Soundsync next to the second headphone / speaker and wait 30 secs for connection. Once Soundsync is successfully connected to the second headphone / speaker, turn off your Soundsync.

5. Now turn the first headphone / speaker on, wait for 10 to 20 secs, then turn on your Soundsync, wait for another 30 secs. Both headphones / speakers will have sound if the connection is successful. For unsuccessful connection, restart your Soundsync to connect the devices or repeat above procedures.

Play / pause

Note: not available in Transmitter mode(TX).

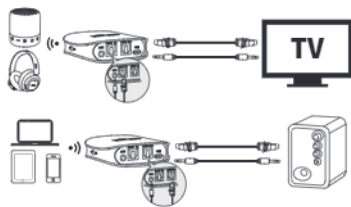

AUX mode

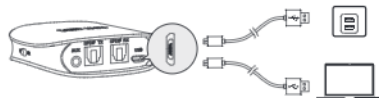

SPDIF mode is the default mode, but Soundsync will automatically switch to AUX mode when 3.5mm audio cable is plugged in.

08

EN SPDIF mode

Charge your SoundSync

Flashing red	Low power
Steady red	Charging
Off	Fully charged

09

Use the included USB cable to charge your SoundSync and make sure it is fully charged before first use.
Disconnect your SoundSync from charger when fully charged.
Do not charge your SoundSync for extended periods.
When not in use, store your SoundSync in a cool place.
